

**Reply from South Tees Clinical Commissioning Group to the recommendations
in the Healthwatch Middlesbrough Making Middlesbrough More Dementia
Friendly**

Hi Toni,

Thanks again for this report. We discussed it at our Operational Management Team on Monday but as you suggest in your report we think the most appropriate place to consider the implications of this is at the Dementia Collaborative Steering Group. We will add this to the agenda at the earliest opportunity and respond after this. I hope this will be acceptable.

Julie

I can confirm that the report was submitted to the Dementia Collaborative Steering Group on 23rd November where it was fully discussed. The recommendations were passed and will be taken forward and amalgamated with the ongoing work in making Middlesbrough more Dementia Friendly. Healthwatch Middlesbrough will of course monitor the situation and progress on your behalf.
